Epson **Stylus Photo 1500W**

For photo enthusiasts looking to move into A3+ printing, the Epson Stylus Photo 1500W offers an unbeatable combination of convenience and superior specifications for high-quality, glossy photo output. It will also appeal to SOHO users wanting a multi-purpose printer with advanced connectivity and exceptional photo and presentation print quality.

Users can print from anywhere in the home, as the 1500W has built-in Wi-Fi connectivity. This enables convenient, wireless printing from laptops and desktops. In addition, users can print wirelessly from mobile devices, such as smartphones and tablet PCs, using Epson's free iPrint app[1].

A wide range of printing projects can be undertaken with the 1500W, which prints on glossy paper, matte paper, plain paper, envelopes, iron-on transfers plus CDs and DVDs. Standard 4 x 6 inch (10 x 15cm) photos all the way up to panoramic and A3+ prints are supported.

The 1500W uses Epson's Claria Photographic 6-colour, dye-based ink-set to achieve vivid, long-lasting results. Coupled with Epson's Micro Piezo printhead, which gives a 1.5pl droplet size, the result is high-quality, 5760 x 1440dpi prints with fine detail and smooth tonal gradations.

A print speed of 45 seconds per 4 x 6 inch (10 x 15cm) print in default Photo mode[2] means that the 1500W is highly productive.
